N° 12 // Stop the Study Campaign 2015

## PREPARING FOR FRACKING

**Don't let the fox  
guard the chicken  
house.**

### WHAT IS OUR GOVERNMENT DOING?

At present, a study that is to underpin Government policy on fracking is going ahead but not as envisaged.

- Effectively, the study has been taken over by two consultancy firms who are working for oil and gas companies, including BP and Shell. The study is not independent.

### FRACKING – HOW BAD IS IT?

**Of over 100 original  
research studies  
published in 2015 on  
impacts of fracking:**

**69%** of studies on water quality found potential for, or actual evidence of, water contamination

**88%** of studies on air quality found elevated air pollutant emissions

**84%** of studies on human health risks found signs of harm or indication of potential harm.

### WHAT ARE WE DOING?

**We are  
organising the  
national**

---

at regulations and HOW it can be rolled out in Ireland. Human health is ignored.

## CAMPAIGN

- The next phase of the “research” is the issuing of tenders for a number of seismic testing and ground monitoring stations north and south of the island, providing valuable information to the fracking companies. These tenders are due to be issued immediately.

**PLEASE JOIN IN!**

Click [here](#) for more details.

## WHAT CAN YOU DO?

### 1. Campaign rally Thursday 5th of November

**12.30pm** gather outside the Dáil, Leinster House.
